Stand-Format: round
Stand diameter: 500 mm
Weight: 8,3 kg

PRODUCT ADVANTAGES

- Contactless operation via foot pedal
- high-quality
- stable construction
- including three refillable bottles

USE

The hygiene standards have changed significantly due to the current virus-related situation. In order to be able to offer you and your customer's maximum protection, our "STUKE-CARE program" includes the contactless disinfection dispenser DS1000.

No matter whether for trade, catering or private use: The DS1000 is easy to set up and operate. The foot pedal ensures contactless use and the robust system enables stable and easy-care handling.

The DS1000 is **100% Made in Germany** and can be installed indoors and outdoors, placed in entrance areas or flexibly transported to the desired locations.

The Changing of the enclosed bottles is designed for quick and easy operation.

Furthermore, the measures for self-protection and external protection should be taken into consideration (Cough & sneeze rules, good hand hygiene and keeping away (at least 1.5 m) from other people.)
